# PROJECT ASSETS

My DOG

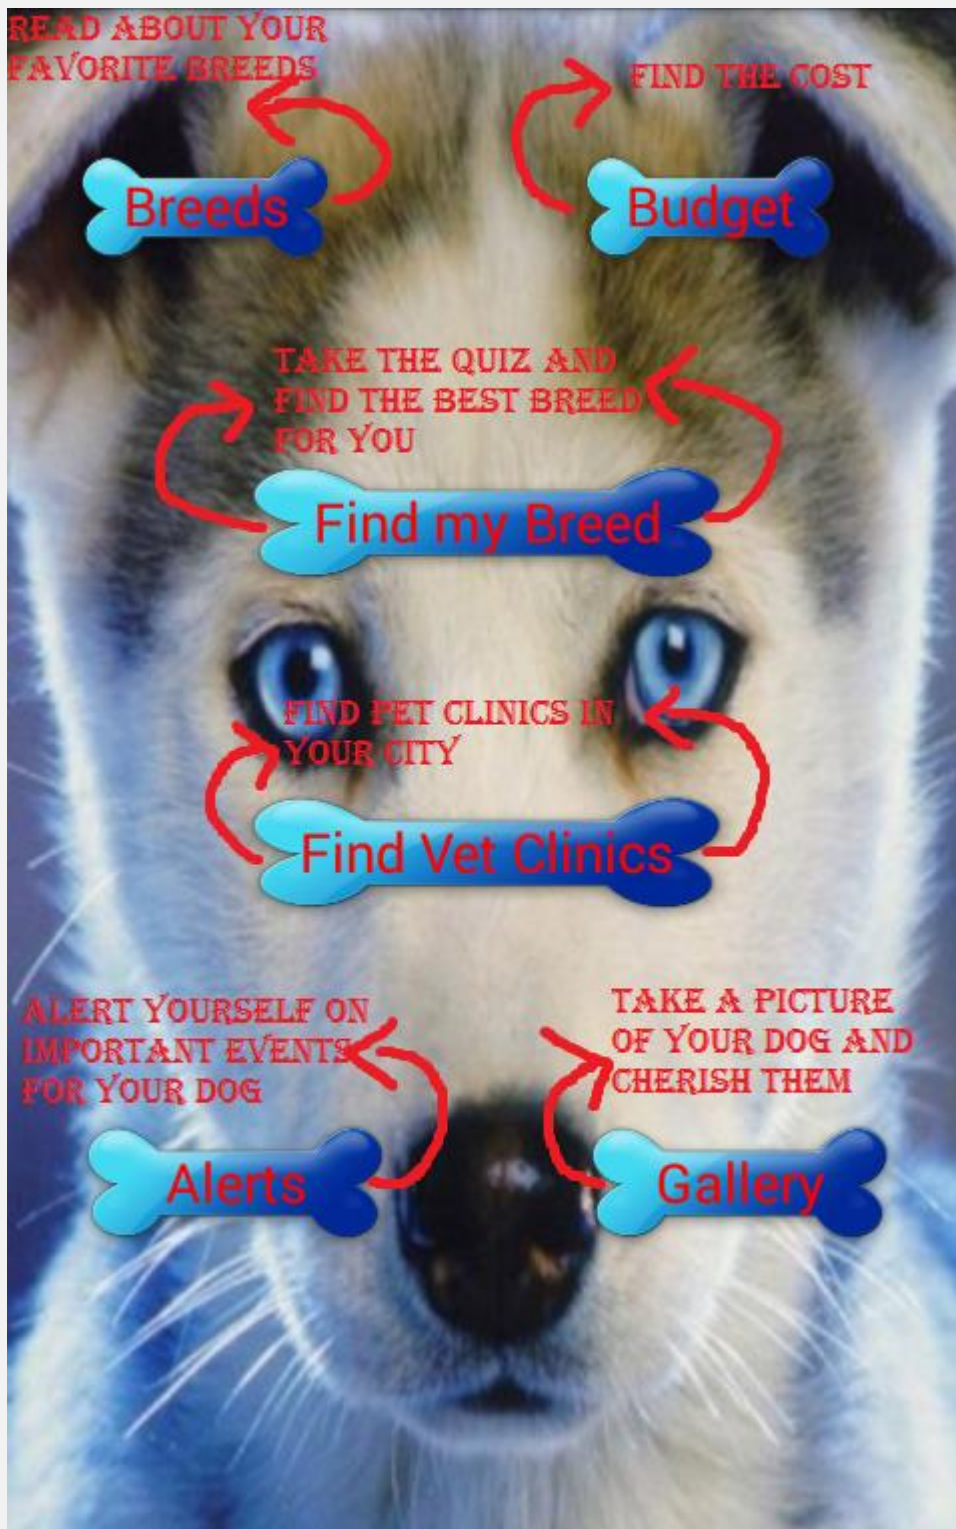

-SRISARGURU SRIDHAR

## MyDog (What is it?):

This app is for everyone who love dogs and to make finding and owning a dog easier. Browse through your favorite breeds, find cost of the breeds, find a breed which is suitable for you by taking a quiz. You can also add alerts to your calendar, take pictures and store them. Need a pet doctor, find the clinics in your city and their location on the map just by a click.

## Features:

# BREEDS:

## Breeds

Akita [READ ABOUT A VARIETY OF BREEDS](#)

Alaskan Malamute

Australian Shepherd

Basset Hound

Beagle

Bernese Mountain Dog

Border Collie

Boston Terrier

Boxer

Brittany

Bulldog

Bullmastiff

Cavalier King Charles Spaniel

Chihuahua

Border Collies, known as the workaholics of the dog world, are a lot of work. They need a job to do, whether its herding, agility, flyball, Frisbee championships ... anything to keep their overactive brains busy! If you don't give a Border Collie the physical and mental exercise he needs, he will destroy everything. And I'm not just talking about socks and teddy bears. I'm talking: mattresses, recliners, carpets, and wooden stairs! They

## BUDGET:

**Budget**

Enter the starting and ending range to find which breed is within that range(In dollars)

Enter the starting range

Enter the ending range

**"ENTER YOUR BUDGET  
AND FIND THE COST"**

 Submit

This feature allows the user to enter a starting range and ending of the amount they wish to spend on a dog and it displays the breeds that can be bought within that price range.

# FIND MY BREED:

## Find my Breed

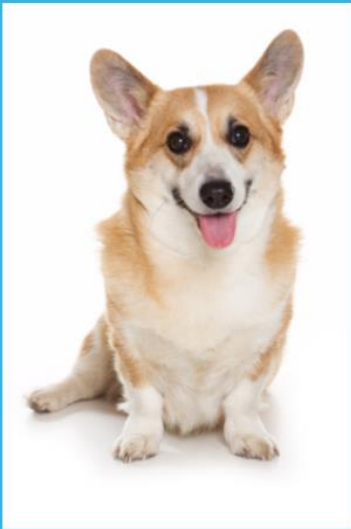

This is a simple Quiz which asks you a set of Questions. Depending on your answers we recommend you a Dog breed with a suitable personality

**"TAKE THE QUIZ  
AND FIND YOUR  
BREED"**

[Start](#)

The Breed for you is:

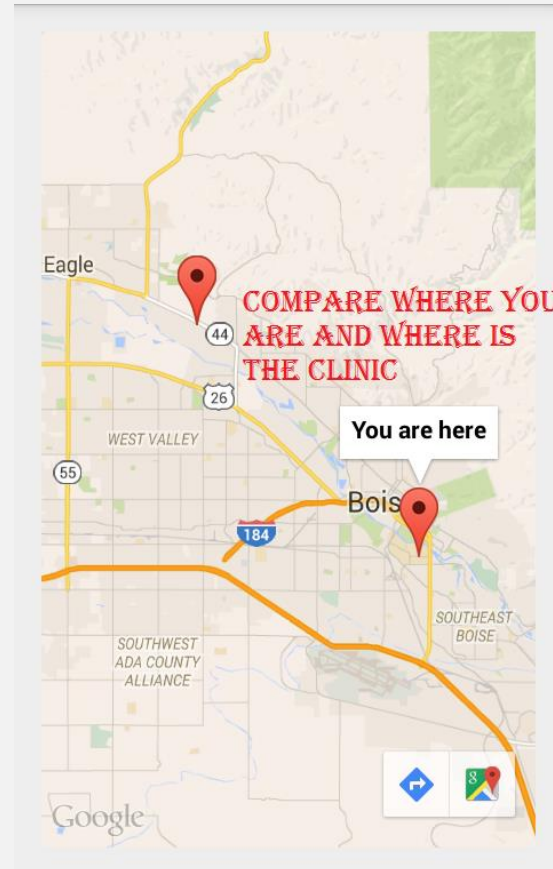

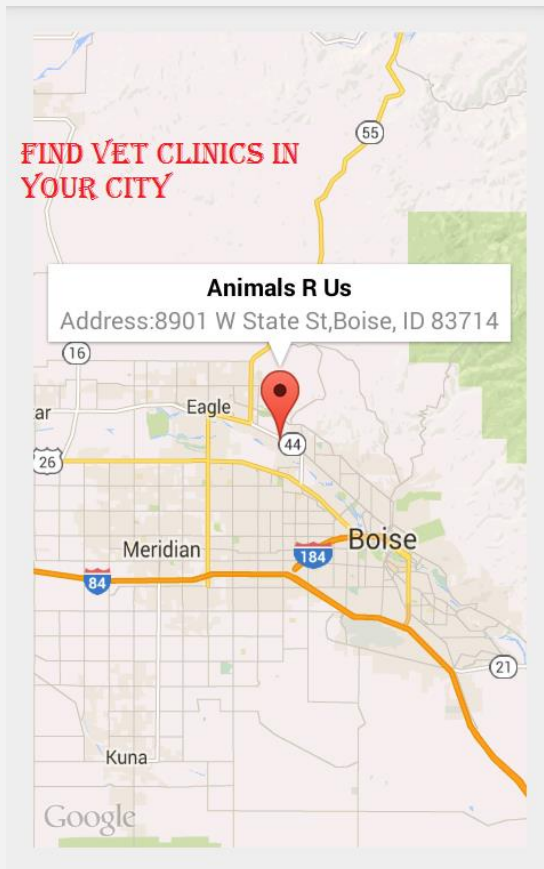

## Pembroke Welsh Corgi

[View Breeds](#)

This feature is a quiz. The quiz contains question which is based on the user and depending on the user given by the user it recommends a dog breed which is suitable.

## FIND VET CLINICS:

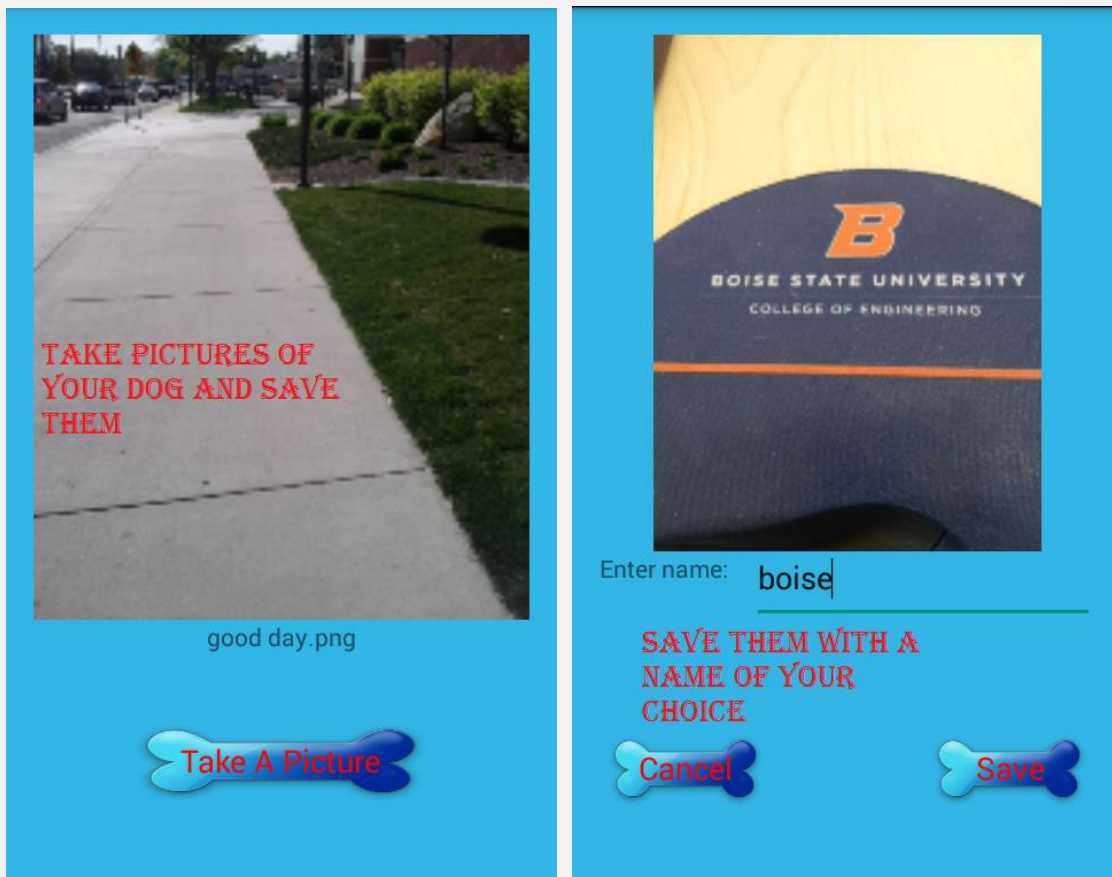

This feature allows user to choose a city and it displays the vet clinics in the city in a list. When they click on a clinic the page shifts to a map and it shows the location of the clinic. If the GPS is not on it prompts the user to turn it on. If they don't it just shows the location of the clinic. If the user turns on the GPS , once the location is determined it zooms to a level that points both the clinic and location of user using markers. Clicking on the marker gives information about clinic.

## ALERTS:

This feature connects to the google calendar of the user or if they don't have one lets them to connect to one. This is for Dog alerts which goes to an events page and lets you create an event or reminder in their calendar. This is easier because they can find clinics and add events from the same app.

## GALLERY:

This feature is just for the user to click pics of their dog and give a name for it. It saves the pics on the sd card by creating a folder called "My Dog" and it also shows up in gallery. The user can also go through the pictures using this app.
